Website Order Number (if applicable):

---

### **CORE POLICY:**

1) If you have purchased DKS cams from us, core return must be done within 20 days of the purchase invoice date to receive the full credit on your cores. Cores returned past the due date will have a 50% reduction in the potential core credit. We can also apply your core credit towards future "in-store" purchases...redeemed anytime you wish. Just ask us for a super duper Coupon Code!

2) Before you send your cores in, wipe them down with a shop rag. They must be completely dry of oil and greasy residue. Cleaning with carburetor or brake cleaner is also a fast and easy way to clean them.

3) Remove cam sprockets.

4) Cams must be in good condition. What denotes "good"? No shipping damage, stripped threads, fractures, journal grooves (that can be caught with a fingernail), lobe gouges, wrench marks on the hex part of the shanks, heavy oil seal grooving, chipped lobes or heavy rust. Surface rust is "OK"...but not pitted metal.

5) Package your cams in a sturdy box with lots of packing. Assume the mail service will drop kick your package from FL to HI. There is a good chance your cams will arrive damaged if they're not well protected. You can't package them too safely.

6) Cores are subject to inspection upon arrival and accepted only at our discretion.

7) Complete and return this form (along with your cam cores) to the address provided at the top of this form. **DO NOT PUT A "SIGNATURE REQUIRED" ON THE PACKAGE PLEASE!**
